NEEDS REVIEW

Respray mentioned after "no accidents"

- Dent: small, about the size of a golf ball (87%)
- Aftermarket mods: wheels; reputable installer (82%)
- Respray flagged at 40% confidence
- "Windscreen is fine" ignored

96% CLASSIFIER ACCURACY · 8 CATEGORIES

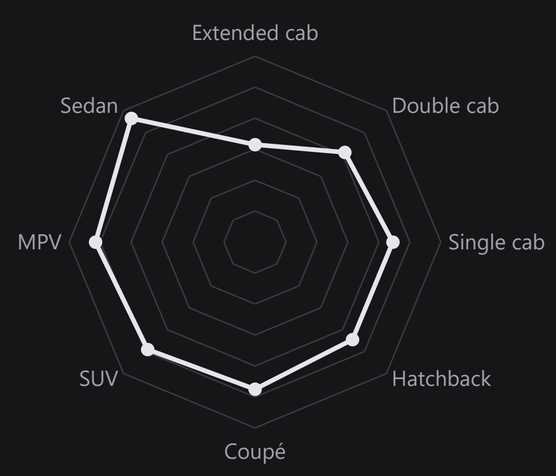

VALUE OVER TIME

−9.5% / year

Average car, like-for-like across model years

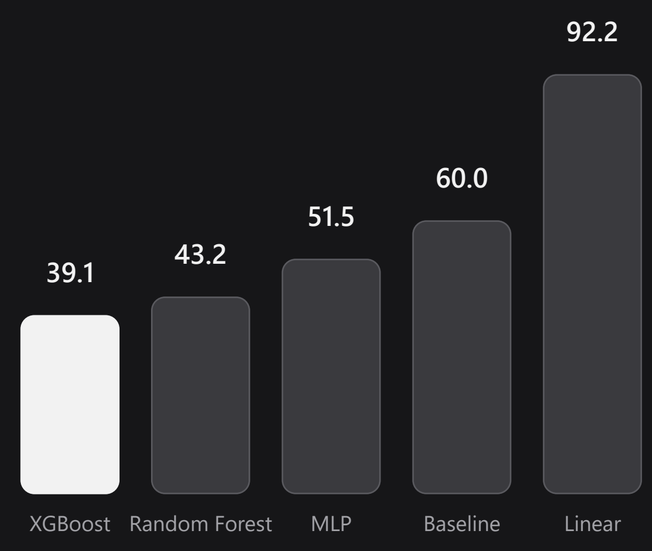

DEPRECIATION BY BODY TYPE

Bakkies hold value best (6.3% a year), sedans worst (11.3%)

MODELS COMPARED

AVG ERROR, R K

THE PROBLEM

Dealerships value trade-ins by hand: slow, inconsistent between consultants, and never recorded. Overpaying loses margin; underpaying loses the deal.

HOW IT WORKS

01 **Chat**

Customer picks their car, year and mileage

02 **Understand**

NLP turns their words into condition findings

03 **Predict**

XGBoost estimates the value and a range

Every car, every customer, one clear value

BUILT WITH

Python XGBoost scikit-learn TensorFlow Flask GitHub
